DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 21, 2008 has been entered.

Status of Claims

Claims 1-3 and 5-9, filed July 23, 2008, are currently pending and are presented for examination on the merits. Claims 1-3, 5-7 and 9 have been found allowable. Claim 8 have been rejected.

Allowable Subject Matter

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

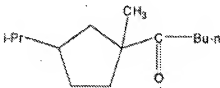

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by McCarthy et al., Journal of American Chemical Soc., Vol. 79, No. 2, pp. 472-480 (1957), cited by Applicant. The McCarthy et al. reference discloses compound 41A, an α,α -disubstituted 2-pyridinemethanol of the formula (A) at Table I, where R¹ is phenyl and R² is 1-methyl-3-(2-propyl)-cyclopentyl. Compound 41A anticipates claim 8 when R¹ and R² is aryl and R³ is OH. It is noted that the Examiner reads the term "aryl" as an organic radical derived from an aromatic

Art Unit: 1621

compound by the removal of one atom (in this case a hydrogen atom) and thus the radicals pyridyl and phenyl in compound 41A meets that definition.

Claim 8 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Abramov et al., Zhurnal Obshchei Khimii (1952), 22, 1450-1457, now of record. The Abramov et al. reference discloses the compound having the structure

. Said structure

anticipates claim 8 when R² and R³ is a carbonyl and R¹ is n-butyl.

Allowable Subject Matter

Claims 1-3, 5-7 and 9 are allowed over the prior art of record.
